

PRODUCTIVITY MAY TEMPORARILY DIP

During change, performance may **slow down** before it improves.

THAT CAN HAPPEN BECAUSE EMPLOYEES ARE:

-  Learning new systems
-  Reworking old habits
-  Asking more questions
-  Making early mistakes
-  Double-checking decisions
-  Spending time in training
-  Adjusting to new expectations

Employees should understand that **TEMPORARY DISCOMFORT** does not always mean the change is failing.

PROGRESS
TAKES
PATIENCE.

Learning
Adapting
Growing

THE LEARNING CURVE IS NOT FAILURE.
IT IS PART OF THE PROCESS.

Be patient with yourself. Stay curious. Keep moving forward.
