

RESISTANCE IS INFORMATION

Resistance is often viewed as a bad attitude, but from the employee side, resistance can reveal something important.

RESISTANCE MAY MEAN:

The employee does not understand the change

The employee disagrees with the reason

The employee sees a risk leaders missed

The employee lacks training

The employee is overwhelmed

The employee does not trust the source

The employee has seen past changes fail

A HEALTHY EMPLOYEE MINDSET:

“Instead of silently resisting, I need to communicate what I’m concerned about.”
